SUMMARY

Full Stack Developer specializing in Next.js and TypeScript, with experience building role-based dashboards, SaaS platforms, and payment-integrated systems. Strong foundation in scalable architecture, RESTful APIs, and relational databases. Passionate about writing clean, maintainable code and delivering high-performance web applications.

EXPERIENCE

PT Cangkir Tech

Co-Founder & Lead Engineer

January 2026 – Present

Pontianak, Indonesia

- Co-founded a digital agency serving local small and medium businesses (MSMEs), defining the technical vision and engineering standards from day one.
- Led full-stack development from architecture through deployment, delivering scalable and accessible solutions tailored to each client's operational needs.
- Aligned technical roadmaps with business priorities, establishing engineering practices that balance speed, quality, and cost-effectiveness for growing regional enterprises.

Dinas Sosial Kabupaten Kubu Raya

Front End Developer Intern

November 2025 – January 2026

Pontianak, Indonesia

- Designed and delivered a full-featured role-based admin dashboard for government social services, enabling secure document management across multiple user roles.
- Built a structured file upload system with real-time tracking and comprehensive user administration, streamlining internal workflows for case management.
- Strengthened data privacy and system security through automated activity logging and protected route architecture.

PROJECTS

Full-Stack E-Commerce Platform | *Next.js, NestJS, PostgreSQL, Prisma*

- Built a production-ready e-commerce platform with distinct dashboards for Admin, Seller, and Customer roles, enabling multi-vendor product management and secure transactions.
- Integrated cloud-based media storage and Midtrans payment processing to support seamless checkout experiences and reliable order fulfillment.
- Designed a type-safe backend with NestJS, PostgreSQL, and Prisma ORM, ensuring data integrity and maintainable API contracts across the stack.

Automated Invoicing SaaS | *Next.js, Tailwind CSS, Server Actions*

- Developed an automated invoicing SaaS that simplifies billing and client management for small businesses, reducing manual administrative overhead.
- Enabled scheduled invoice generation and email reminders through Cron-based automation, improving payment collection timelines for users.
- Integrated secure payment flows using Midtrans and Next.js Server Actions, providing a seamless checkout experience with modern authentication safeguards.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS

Backend: Node.js, NestJS, Go (Golang), RESTful APIs

Database: PostgreSQL, SQL, Prisma ORM

Tools & Platform: Git, Docker

EDUCATION

Universitas Muhammadiyah Pontianak

Bachelor of Computer Science in Informatics Engineering; GPA: 3.xx/4.00

Expected Graduation: 2026

Pontianak, Indonesia
