SUMMARY

Co-founder and Full Stack Developer with hands-on experience delivering production systems for government clients and MSMEs. Shipped 3 client projects as the sole engineer at a newly founded agency while finishing a Computer Science degree. I own the full delivery lifecycle — from architecture and backend design to frontend implementation and deployment — using Next.js, NestJS, and TypeScript. Open to full-time roles and freelance projects where technical ownership matters.

EXPERIENCE

PT Cangkir Tech

January 2026 – Present

Co-Founder & Lead Engineer

Pontianak, Indonesia

- Co-founded PT Cangkir Tech from zero and delivered 3 client projects within the first months of operation, serving as the sole engineer handling everything from scoping and architecture to deployment.
- Shipped production landing pages for 3 MSME clients across Pontianak, translating each client's business goals into fast, accessible, and maintainable web presence.
- Established engineering and client delivery standards from day one — enabling a newly founded agency to acquire and fulfill real client work at a professional level.

Dinas Sosial Kabupaten Kubu Raya

November 2025 – January 2026

Frontend Developer Intern

Pontianak, Indonesia

- Replaced a manual document workflow with a role-based digital dashboard serving 3 access levels (Super Admin, Admin, User) — enabling secure document management across the agency's internal teams.
- Built a file upload system with real-time tracking and role-specific user administration, streamlining case management workflows that previously relied on manual coordination.
- Implemented automated activity logging and protected route architecture that met government-level data security and audit trail requirements.

PROJECTS

Full-Stack E-Commerce Platform | *Next.js, NestJS, TypeScript, PostgreSQL, Prisma, Midtrans*

- Designed and built a multi-vendor e-commerce platform from scratch — supporting 3 independent role dashboards (Admin, Seller, Customer) with full product management and payment integration.
- Implemented a type-safe NestJS backend with Prisma ORM and integrated Midtrans payment gateway, completing the full stack from database schema to production checkout flow without external engineering support.

Automated Invoicing SaaS | *Next.js, TypeScript, Prisma, PostgreSQL, Midtrans, Server Actions*

- Built an end-to-end invoicing SaaS solving a real problem for small businesses — automating invoice generation, email payment reminders, and collection tracking via Cron-based scheduling.
- Integrated Midtrans payment gateway with secure Next.js Server Actions, delivering a production-ready checkout flow and handling the full product lifecycle from schema design to deployment.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS

Backend: Node.js, NestJS, Go (Golang), RESTful APIs

Database: PostgreSQL, SQL, Prisma ORM

Tools & Platform: Git, Docker, Nginx

EDUCATION

Universitas Muhammadiyah Pontianak

Bachelor of Computer Science in Informatics Engineering; GPA: 3.xx/4.00

Expected Graduation: 2026

Pontianak, Indonesia
